EXPERIENCE

Co-Founder & CTO - Konecta Labs (Own Consultancy)

06/2024 - Present

- Own consultancy delivering GenAI products for international clients; led hands-on work across architecture, backend, LLM orchestration, deployment, and stakeholder communication.
- eCampus / Avatar4University (06/2024 - 12/2025)**: built an AI-assisted course platform for an Italian university research initiative promoted by ENBAS and academic partners, using **FastAPI**, **DSPy**, **Next.js**, **Clerk RBAC**, **SQLModel**, and **Docker**.
- Implemented multimodal pipelines for course content, slides/PDFs, audio, and avatar video using **OpenAI/LiteLLM**, **Whisper**, **MuseTalk**, **FFmpeg**, **S3**; integrated **BSC MareNostrum 5 (EuroHPC)** GPU/HPC workflows with **SLURM** jobs and SSH tunnels.
- DCLATAM (12/2025 - 03/2026)**: built a production quote bot for a LATAM/US technology solutions company; cut manual quote prep by turning raw catalog/API lookup into guided **DSPy Chain-of-Thought** recommendations with multi-query search, parallel async calls, stock analysis, traceability, feedback capture, and GEPA/LLM-as-judge experiments.

AI Engineer & Team Lead - Network Ninja Inc

09/2023 - 05/2024

- Founded the AI function, shipped multiple AI products end-to-end, and grew the team while partnering with the CEO on roadmap and execution.
- Built production **LLM systems** with **OpenAI**, **function calling**, **structured outputs**, **embeddings**, vector databases, and **RAG** for chat, retrieval, and workflow automation.
- Orchestrated **AI agents** and multi-step workflows with **tool calling**, memory/state, and human-in-the-loop patterns; familiar with **LangChain** and **LangGraph** style architectures.
- Added **observability** and feedback loops for prompt iteration, latency tracking, failure analysis, and quality monitoring; worked with tooling such as **Langfuse**.
- Shipped **voice** and **multimodal** features with **Whisper**, **GPT Vision**, **Text-to-Speech**, **voice cloning**, **MuseTalk**, and custom **YOLO** models.
- Ran high-scale AI services handling thousands of AI API calls per minute with **FastAPI**, async Python, concurrency controls, retries, and rate limiting.

Mid Python Developer - Dyvenia

09/2022 - 12/2023

- Developed REST APIs using **FastAPI**, **SQLAlchemy**, and **SQLModel** for data modeling and database interactions.
- Built CLI tools with **Typer**, implemented testing with **PyTest**, containerized applications with **Docker**.

Junior Python Developer - Cattler

07/2020 - 03/2022

- Django**, **Django REST Framework**, **PostgreSQL**, **GCP**. AI image-recognition/GIS.

EDUCATION

UADE University, Data Science

03/2018 - 03/2020
